- C. Time D
- DST (Daylight Savings Time) Indicator Temperature
- E. F. MIN Temperature MAX Temperature
- G.

2

- All LCD segments will light up for a few seconds.
- The thermometer is now ready to use. On the display, 0:00 is flashing and the DST symbol (see Fig. 1, D) is flashing.
- If you are setting up the thermometer during Daylight Savings Time, press the +/-1 button for confirmation while the DST symbol is flashing and the DST symbol will remain, indicating that the unit is in DST mode.
- If there is no confirmation within 15 seconds, the DST symbol will stop flashing and will disappear. If this has happened and you need to put your thermometer into DST mode, see the section on Daylight Savings Time later in this manual.

Note: The left NiMh battery (when holding the thermometer with the display at the bottom) is the illumination battery

The right non-rechargeable alkaline battery provides powers all other functions.

SET THE CLOCK

- Press the MODE button and the hour digits in the upper display start flashing.
- Press the +1 button to adjust the hour value. Note: Hour is 24h at this point. •
- Press the MODE button again to confirm. The minute digits start flashing. Press the +1 button to adjust the minutes value.
- Press the MODE button to confirm.

CHANGE THE DISPLAY

There are two display modes for your thermometer. Press the +1 button to change between Mode 1 and Mode 2 or back

Mode 1: All temperatures are in Celsius, and the time mode is 24-hour time. Mode 2: All temperatures are in Fahrenheit, and the time mode is 12-hour (AM/PM) time.

CHANGE BETWEEN DAYLIGHT SAVINGS TIME / STANDARD TIME

Press the +/-1hr (underneath the top part of the thermometer to enable/disable DST mode

Note: When the display is in DST mode, the DST indicator is shown (see Fig.1, D).

Backlight

To set the backlight mode, find the ECO slide switch underneath the top section of the thermometer (see Fig. 3). The display will automatically turn on the backlight for night viewing. The backlight can be set to one of two modes:

Full Power: When the ECO switch is OFF, the backlight comes on at dark and turns off at dawn), as soon as the solar panel no longer detects light (with appropriate battery charge). ECO MODE – When the ECO switch is ON, the backlight turns on at dark, but only between 5:00PM and 9:00PM.

TEMPERATURE DISPLAY

The middle display shows the current e. The lower display shows the history of minimum and maximum temperature.

The black pin close to the +/-1hr button and ECO slide is the temperature probe. It has no adjustments, and should not be moved or twisted. Please take care not to break this probe.

IMPORTANT NOTICE

Due to heat emission and the protected location of your window, it is possible for the temperature displayed to be higher than the outdoor temperature would be read at another nearby unsheltered location

MAX/MIN TEMPERATURES

The Max temperature is updated each day at 8:00AM, and the Min temp is updated each day at 8:00PM
